BIOCHEMISTRY AND CELL BIOLOGY

BIOCHIMIE ET BIOLOGIE CELLULAIRE

Volume 68, 1990

Contents/Sommaire

JANUARY/JANVIER

This issue is dedicated to
Dr. Morris Kates
in honour of his valuable contributions to
biochemistry in Canada

Ce numéro est dédié au
Dr. Morris Kates
en l'honneur de ses contributions précieuses à la
biochimie au Canada

REVIEWS / SYNTHÈSES

Michel Lafleur, Myer Bloom, and Peter R. Cullis Lipid polymorphism and hydrocarbon order 1

Ilona Skerjanc Mitochondrial import: properties of precursor proteins 9

Richard M. Epand Relationship of phospholipid hexagonal phases to biological phenomena 17

ARTICLES

Mayer B. Goren and Natan Mor Influence of phagosomal contents on the apparent inhibition of phagosome–lysosome fusion mediated by polyanionic substances in mouse peritoneal macrophages 24

Werner Fischer, Tibor Mannsfeld, and Gerhard Hagen On the basic structure of poly(glycerophosphate) lipoteichoic acids 33

Antti Seppo, Leena Penttilä, Anne Makkonen, Anne Leppänen, Ritva Niemelä, Jussi Jäntti, Jari Helin, and Ossi Renkonen Wheat germ agglutinin chromatography of GlcNacβ1-3-(GlcNAcβ1-6)Gal and GlcNAcβ1-3(GlcNAcβ1-6)Galβ1-4-GlcNAc, obtained by *in vitro* synthesis and by partial cleavage of teratocarcinoma poly-*N*-acetyllactosaminoglycans 44

Nabila M. Wassef, Glenn M. Swartz, Jr., Carl R. Alving, and Morris Kates Antibodies to liposomal phosphatidylcholine and phosphatidylsulfocholine 54

Michiyuki Kojima, Kazutomo Seki, Masao Ohnishi, Seisuke Ito, and Yasuhiko Fujino Structure of novel glyceroglycolipids in Adzuki bean (*Vigna angularis*) seeds 59

Jens R. Coorssen and R. P. Rand Effects of cholesterol on the structural transitions induced by diacylglycerol in phosphatidylcholine and phosphatidylethanolamine bilayer systems 65

J. M. Boggs, D. Mulholland, and K. M. Koshy Mixtures of semisynthetic species of cerebroside sulfate with dipalmitoyl phosphatidylcholine. Thermotropic phase behaviour and permeability 70

H. Keith Withers and Philip D. Bragg Potentiometric and spectroscopic properties of the cytochrome *o* complex of *Escherichia coli* 83

Masateru Nishihara and Yosuke Koga Natural occurrence of archaetidic acid and caldarchaetidic acid (di- and tetra-ether analogues of phosphatidic acid) in the archaebacterium *Methanobacterium thermautotrophicum* 91

Benoy Banerji and Carl R. Alving Antibodies to liposomal phosphatidylserine and phosphatidic acid 96

P. Norberg, K. Larsson, and C. Liljenberg A study of membrane lipids from dehydration-acclimated *Brassica napus* root cells: formation of a cubic phase under physiological conditions 102

M. C. Gutierrez, A. Ventosa, and F. Ruiz-Berraquero Deoxyribonucleic acid relatedness among species of *Haloarcula* and other halobacteria 106

Lidija Stuhne-Sekalec and Nikola Z. Stanacev Biosynthesis of phosphatidylglycerol and phosphatidylglycerolphosphate in submitochondrial membranes isolated from guinea pig liver is absolutely dependent on CDP-diglycerides imported from microsomal membranes 111

Julie Lacasse, Rosalind S. Labow, Morris Kates, and George A. Adams Transfer of arachidonic acid from phosphatidylcholine to phosphatidylethanolamine during storage of human platelets for 5 days 117

Krishna G. Peri, Hughes Goldie, and E. Bruce Waygood Cloning and characterization of the *N*-acetylglucosamine operon of *Escherichia coli* 123

J.-M. Touze-Soulet, J. D. Weete, M. Sancholle, J. Rami, and R. Dargent Influence of biotin on the lipid composition of plasma membranes from *Hypomyces chlorinus* 138

S. D. Wainwright and Lillian K. Wainwright Thymidine incorporation by cultured chick pineal glands is not subject to adrenergic regulation 145

R. Roy Baker and Zou Dao Loh Fatty acid release in incubations of serum with synaptosome and myelin subfractions of brain 148

E. Yasugi, T. Kasama, M. Shibahara, and Y. Seyama Composition of long-chain bases in sphingomyelin of the guinea pig Harderian gland 154

Rajan George, Ruthven N.A.H. Lewis, and Ronald N. McElhaney Studies on the purified Na^+,Mg^{2+}-ATPase from *Acholeplasma laidlawii* B membranes: a differential scanning calorimetric study of the protein–phospholipid interactions 161

Daniel Leclerc and Léa Brakier-Gingras Study of the function of *Escherichia coli* ribosomal RNA through site-directed mutagenesis 169

Ravinder S. Chana, W. Dale Treleaven, Robert J. Cushley, and Urs P. Steinbrecher Dynamic structure of the lower density lipoproteins. I. Incorporation of high levels of labelled lipids into very low and low density lipoproteins 180

Ravinder S. Chana, W. Dale Treleaven, Yashpal I. Parmar, and Robert J. Cushley Dynamic structure of the lower density lipoproteins. II. Deuterium NMR studies of the monolayer of very low and low density lipoproteins 189

Douglas L. Hogue, Kevin C. Hodgson, and Carol E. Cass Effects of inhibition of N-linked glycosylation by tunicamycin on nucleoside transport polypeptides of L1210 leukemia cells 199

Catherine B. Lazier and W. Carl Breckenridge Comparison of the effects of tamoxifen and of a tamoxifen analogue that does not bind the estrogen receptor on serum lipid profiles in the cockerel 210

P. Koziarz and G. J. Moore Inhibition of enzymatic degradation of angiotensin II in membrane binding assays: utility of 1,10-phenanthroline 218

J. Thomas Buckley Purification of cloned proaerolysin released by a low protease mutant of *Aeromonas salmonicida* 221

Dorothy L. MacDonald and Howard Goldfine Phosphatidylglycerol acetal of plasmenylethanolamine as an intermediate in ether lipid formation in *Clostridium butyricum* 225

Anna-Lisa Kates, Ian R. A. Park, Jean Himms-Hagen, and Rudolf W. Mueller Thyroxine 5′-deiodinase in brown adipose tissue of the cynomolgus monkey *Macaca fascicularis* 231

Daniel A. K. Roncari and Paul. E. Le Blanc Inhibition of rat perirenal preadipocyte differentiation 238

Linda A. Fournier, H. M. C. Heick, and Nicole Bégin-Heick The influence of K^+-induced membrane depolarization on insulin secretion in islets of lean and obese (*ob/ob*) mice 243

Rachel L. Adams, Margot Kogut, and Nicholas J. Russell The effect of salinity on growth and lipid composition of a moderately halophilic Gram-negative bacterium HX 249

U. Saxena, J. Francis-Collins, J. Hall, Y. Legal, J. Barrowman, A. Nagpurkar, and S. Mookerjea Removal of apoprotein-B-containing lipoproteins by plasmapheresis using immobilized phosphorylcholine-binding protein affinity adsorbent 255

Joan Letto, John T. Brosnan, and Margaret E. Brosnan Oxidation of 2-oxoisocaproate and 2-oxoisovalerate by the perfused rat heart. Interactions with fatty acid oxidation 260

L. C. Stewart, M. Kates, P. W. Yang, and H. H. Mantsch Intra- and inter-molecular hydrogen bonding in diphytanylglycerol phospholipids: an infrared spectroscopic investigation 266

Giulio Ferrante, James C. Richards, and G. Dennis Sprott Structures of polar lipids from the thermophilic, deep-sea archaeobacterium *Methanococcus jannaschii* 274

Raymond P. Oomen and Harvey Kaplan Binding of glucagon to lipid bilayers 284

Ramanath Majumdar and William A. Bridger Mitochondrial translocation and processing of the precursor to the α-subunit of rat liver succinyl-CoA synthetase 292

K. M. W. Keough and C. S. Parsons Differential scanning calorimetry of dispersions of products of oxidation of 1-stearoyl-2-linoleoyl-*sn*-glycero-3-phosphocholine 300

Dev Mangroo and Gerhard E. Gerber Synthesis of acyl-coA thioesters 308

Anthony U. Osagie and Maureen E. Bafor Triacylglycerols of oil palm (*Elaeis guineensis* var. *dura*) mesocarp during fruit maturation 313

Gillian D. Henry and Brian D. Sykes Structure and dynamics of detergent-solubilized M13 coat protein (an integral membrane protein) determined by ^{13}C and ^{15}N nuclear magnetic resonance spectroscopy 318

James J. Nagler and David R. Idler Ovarian uptake of vitellogenin and another very high density lipoprotein in winter flounder (*Pseudopleuronectes americanus*) and their relationship with yolk proteins 330

J. J. Myher, A. Kuksis, and L.-Y. Yang Stereospecific analysis of menhaden oil triacylglycerols and resolution of complex polyunsaturated diacylglycerols by gas–liquid chromatography on polar capillary columns 336

G. Lipka and H. Hauser The phase behaviour of lipid X at high water concentration 345

Masahiro Kamekura and Yukio Seno A halophilic extracellular protease from a halophilic archaebacterium strain 172 P1 352

Shaukat Ali and Robert Bittman Synthesis of optically active 1-acyl-2-*O*-alkyl-*sn*-glycero-3-phosphocholine via 1-*O*-benzyl-*sn*-glycerol 3-arenesulfonate 360

Srebrenka J. Huterer and John R. Wherrett Formation of acylphosphatidylglycerol by a lysosomal phosphatidylcholine: bis(monoacylglycero)phosphate acyl transferase 366

NOTES

E. Pérochon, J. de Bony, and J. F. Tocanne Preparation of a fluorescent (anthracene labeled) cardiolipin on a large scale using the metabolic machinery of the bacterium *Micrococcus luteus* 373

Yoshimi Ohno, Mitsuyo Okazaki, and Ichiro Hara Studies on the activity of phospholipase D with alkyl phosphorylcholines 376

Cécile Asselineau et Jean Asselineau Analyse lipidique en taxonomie bactérienne : proposition d'une méthode standardisée 379

Helena Koa, Murray J. Fraser, and Etta Käfer Endo-exonuclease of *Aspergillus nidulans* 387

M. G. Murphy and Z. Byczko Effects of membrane polyunsaturated fatty acids on adenosine receptor function in intact N1E-115 neuroblastoma cells 392

Marina Torreblanca, Inmaculada Meseguer, and F. Rodriguez-Valera Effects of halocin H6 on the morphology of sensitive cells 396

ARTICLES

Madhu K. Natarajan, Bessie S. Fong, and Aubie Angel Enhanced binding of phospholipase-A_2-modified low density lipoprotein by human adipocytes **1243**

Kedar N. Prasad, Randall J. Cohrs, and Opendra K. Sharma Decreased expressions of c-*myc* and H-*ras* oncogenes in vitamin E succinate induced morphologically differentiated murine B-16 melanoma cells in culture **1250**

Karen P. Farrell and Robert A. B. Keates Synapsin-1 is found in a microtubule-associated complex of proteins isolated from bovine brain **1256**

Itsu Kano, Kanako Satoh, Fumiko Nagai, Keiko Ushiyama, Toshiko Nakao, Yukichi Hara, and Kazutaka Kano Antigenic determinant of a monoclonal antibody: extracellular domain at the M3–M4 junction of the α-subunit of Na,K-ATPase **1262**

Eleonora Altman, Douglas W. Griffith, and Malcolm B. Perry Structural studies of the O-chains of the lipopolysaccharides produced by strains of *Actinobacillus* (*Haemophilus*) *pleuropneumoniae* serotype 5 **1268**

R. Béliveau, Y. Gélinas, J. Ferraris, and J. P. Schmit Complete analysis of the trace elements of the kidney **1272**

S. Ramagopal Induction of cell-specific ribosomal proteins in aggregation-competent nonmorphogenetic *Dictyostelium discoideum* **1281**

NOTES

Peter M. Brophy and John Barrett Detoxification of secondary products of lipid peroxidation in the cytosol of a mouse fibroblast cell line **1288**

H. D. Simpson, T. Coolbear, M. Vermue, and R. M. Daniel Purification and some properties of a thermostable DNA polymerase from a *Thermotoga* species **1292**

Joseph Vamecq, Jean-Pierre Draye, and Jacques H. Poupaert Erratum: Studies on the metabolism of glycolyl-CoA **1296**

DECEMBER/DÉCEMBRE

REVIEW / SYNTHÈSE

Steven L. Pelech, Jasbinder S. Sanghera, and Maleki Daya-Makin Protein kinase cascades in meiotic and mitotic cell cycle control **1297**

ARTICLES

Brian B. Hasinoff Oxyradical production results from the Fe^{3+}-doxorubicin complex undergoing self-reduction by its α-ketol group **1331**

A. Rehemtulla, A. Arndt, and D. A. Hart Induction of plasminogen activator inhibitor type 2 expression during differentiation of human K562 cells towards a macrophage phenotype **1337**

Fourth Rossiter Research Conference
Molecular cell biology and disease

Quatrième conférence de recherche Rossiter
(La biologie moléculaire et cellulaire et les maladies)

REVIEWS / SYNTHÈSES

Robert L. Noble The discovery of the vinca alkaloids—chemotherapeutic agents against cancer **1344**

Radhey S. Gupta Microtubules, mitochondria, and molecular chaperones: a new hypothesis for *in vivo* assembly of microtubules **1352**

ARTICLES

Jim A. Wright, Arthur K. Chan, Bob K. Choy, Robert A. R. Hurta, Grant A. McClarty, and Aaron Y. Tagger Regulation and drug resistance mechanisms of mammalian ribonucleotide reductase, and the significance to DNA synthesis **1364**

O. T. Mesmer and T. C. Y. Lo Hexose transport properties of myoblasts isolated from a patient with suspected muscle carnitine deficiency **1372**

Amy Y. P. Mok and William C. McMurray Biosynthesis of phosphatidic acid by glycerophosphate acyltransferases in rat liver mitochondria and microsomes **1380**

Victor S. Sauro and Kenneth P. Strickland Triacylglycerol synthesis and diacylglycerol acyltransferase activity during skeletal myogenesis **1393**

Victor S. Sauro, Henry J. Klamut, William F. Dick, Daniella N. Oey, and Kenneth P. Strickland Ornithine and *S*-adenosylmethionine decarboxylase activities and polyamine contents in developing muscle tissues and primary cultures of normal and polymyopathic hamsters **1402**

Geralyn C. Trudel and Paul C. Holland The glycoprotein-processing inhibitors bromoconduritol and *N*-methyl-1-deoxynojirimycin alter the adhesion phenotype of skeletal myoblasts **1411**

Gieljan J. C. G. M. Bosman and Marguerite M. B. Kay Alterations of band 3 transport protein by cellular aging and disease: erythrocyte band 3 and glucose transporter share a functional relationship **1419**

NOTE

Craig L. J. Parfett, Katarzyna Brudzynski, and Calvin Stiller Enhanced accumulation of mRNA for 78-kilodalton glucose-regulated protein (GRP78) in tissues of nonobese diabetic mice **1428**
